I am a creative and solution-oriented Front-End Developer with a strong passion for building accessible, user-friendly web experiences. I enjoy turning ideas into clean, responsive interfaces using technologies such as HTML, CSS, JavaScript, and modern development tools. I am constantly learning and improving my skills, and I thrive in environments where I can collaborate, take initiative, and contribute to meaningful projects.

Through my technical training and hands-on experience as a coding instructor, I have developed strong problem-solving abilities and communication skills. Teaching others strengthened my understanding of front-end fundamentals while improving my ability to explain complex concepts clearly. I also have experience working with tools such as GitHub, Figma, Visual Studio Code, and project management systems, and I value good structure, accessibility, and user experience in everything I build.

My professional background outside tech has given me valuable strengths that I bring into development work—teamwork, leadership, responsibility, and the ability to stay calm under pressure. Whether coordinating with clients, training new employees, or leading teams in volunteer events, I have learned how to create positive collaboration and deliver results.

I am excited about opportunities where I can grow as a developer while contributing creativity, energy, and technical skills to a team. I would love the chance to discuss how I can contribute to your projects and help build engaging digital experiences.

Thank you for your time and consideration.

Kind regards,

*Rebecka Kinn*

A stylized, handwritten signature in black ink, consisting of a large 'R' followed by a series of loops and a final 'K'.
